

Location Map of Major Florida Wildlife Rehabilitation Centers

There are many smaller rehab facilities in Florida, but listing each one isn't very useful. Many devote all their time to animal care and do not routinely handle inquiries. Not every center can accept every species of wildlife on every occasion. **Use those listed here as sources of information.** These can either directly help or can make recommendations and referrals. Geographic locations are approximate. Information is from published sources and accuracy cannot be guaranteed. Report errors to info@tcwild.org
